

A dark blue, starry night sky with numerous white and light blue stars of varying sizes and brightness. The stars are scattered across the entire frame, creating a dense field of light points.

Night Sky

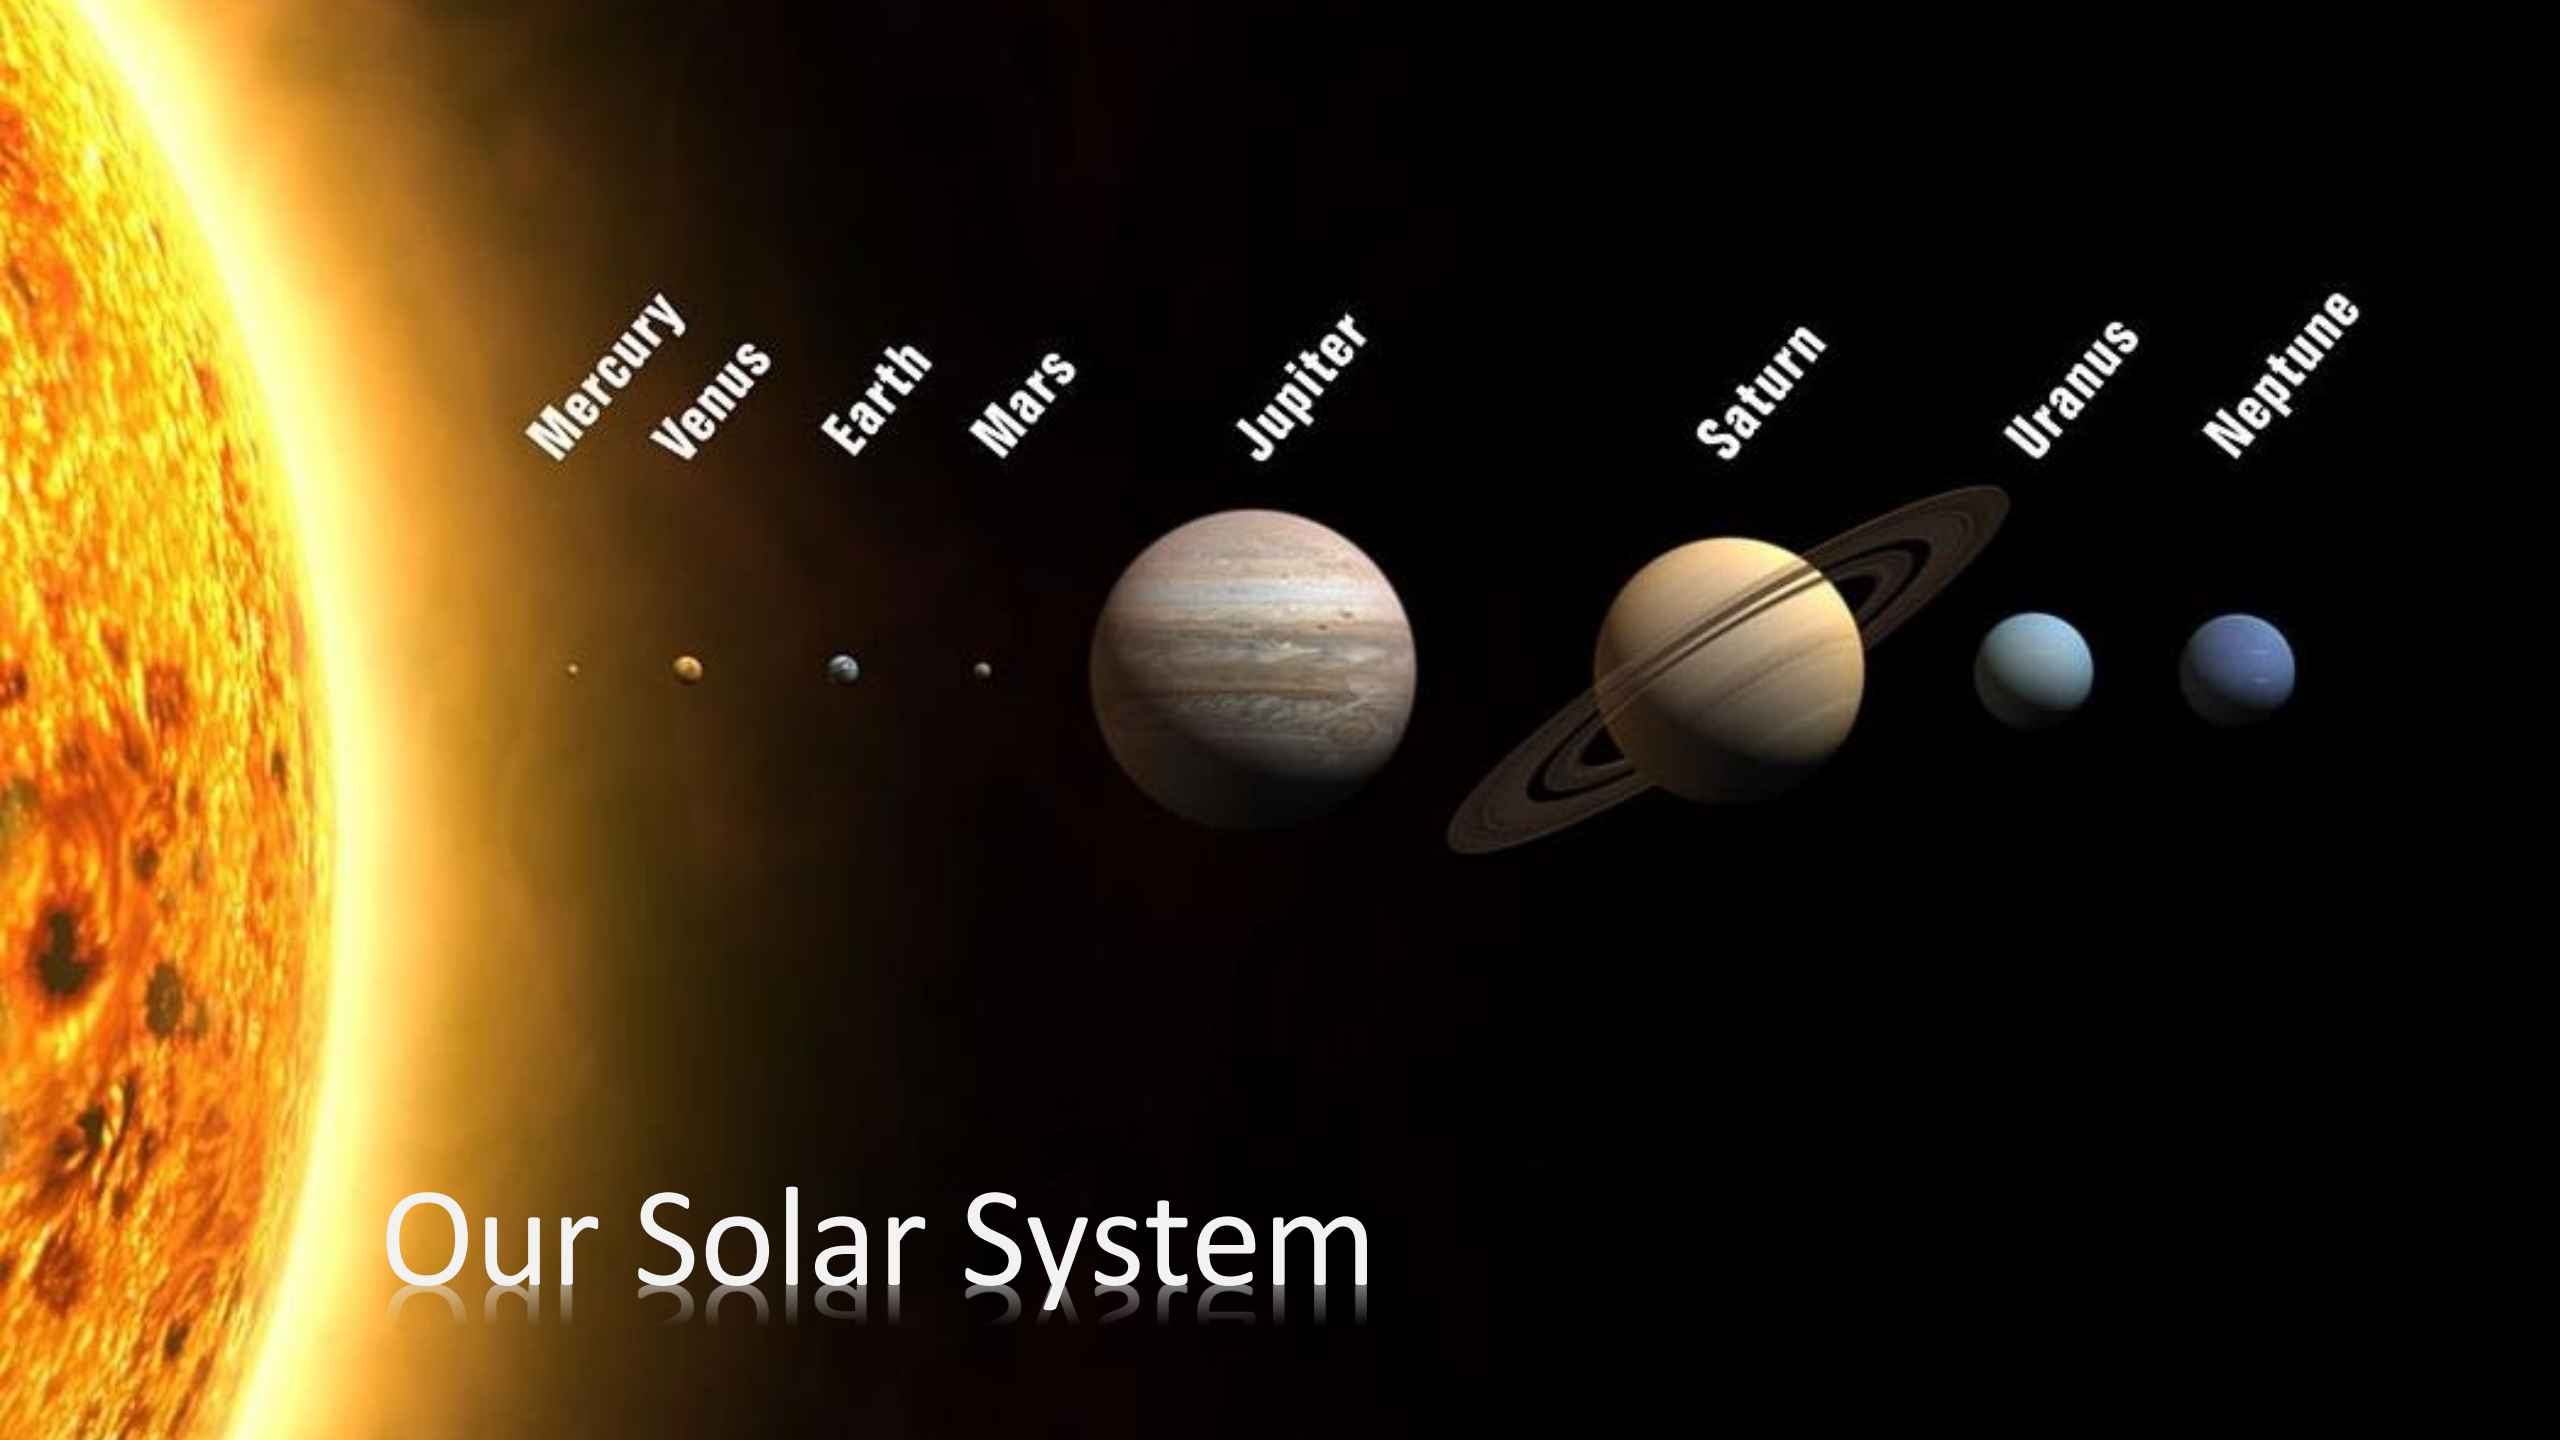

Belinda Montejo

Have you ever wondered what is above us?

Beyond the stars we see each night there is many others things we cant see!

We cant help to think when we look up at the beautiful sky at night.

Our Solar System, Asteroids, Comets, Constellations, Star, Meteors are many things in the sky that we may or may not see

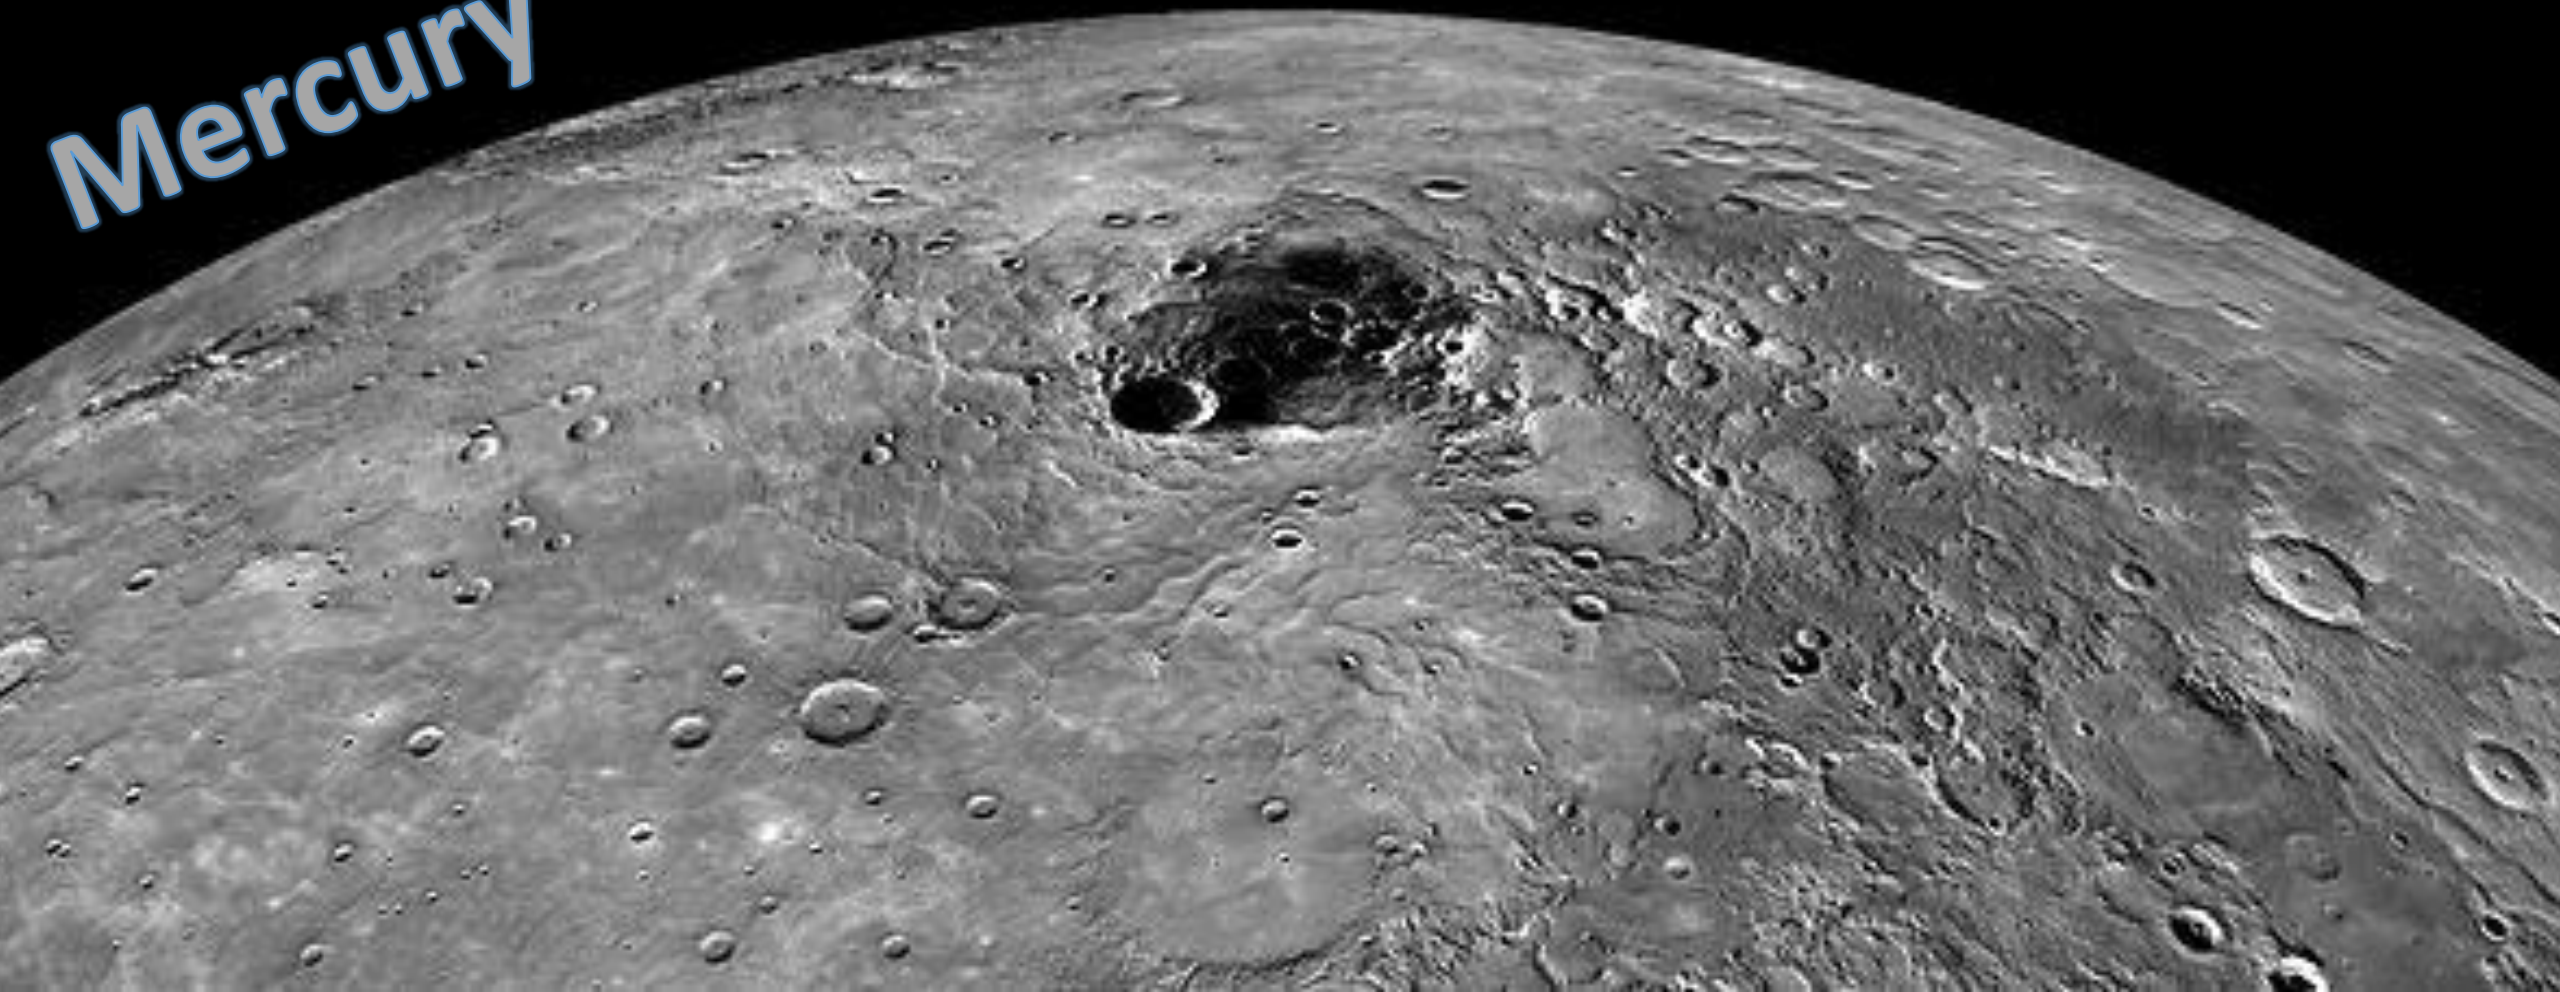

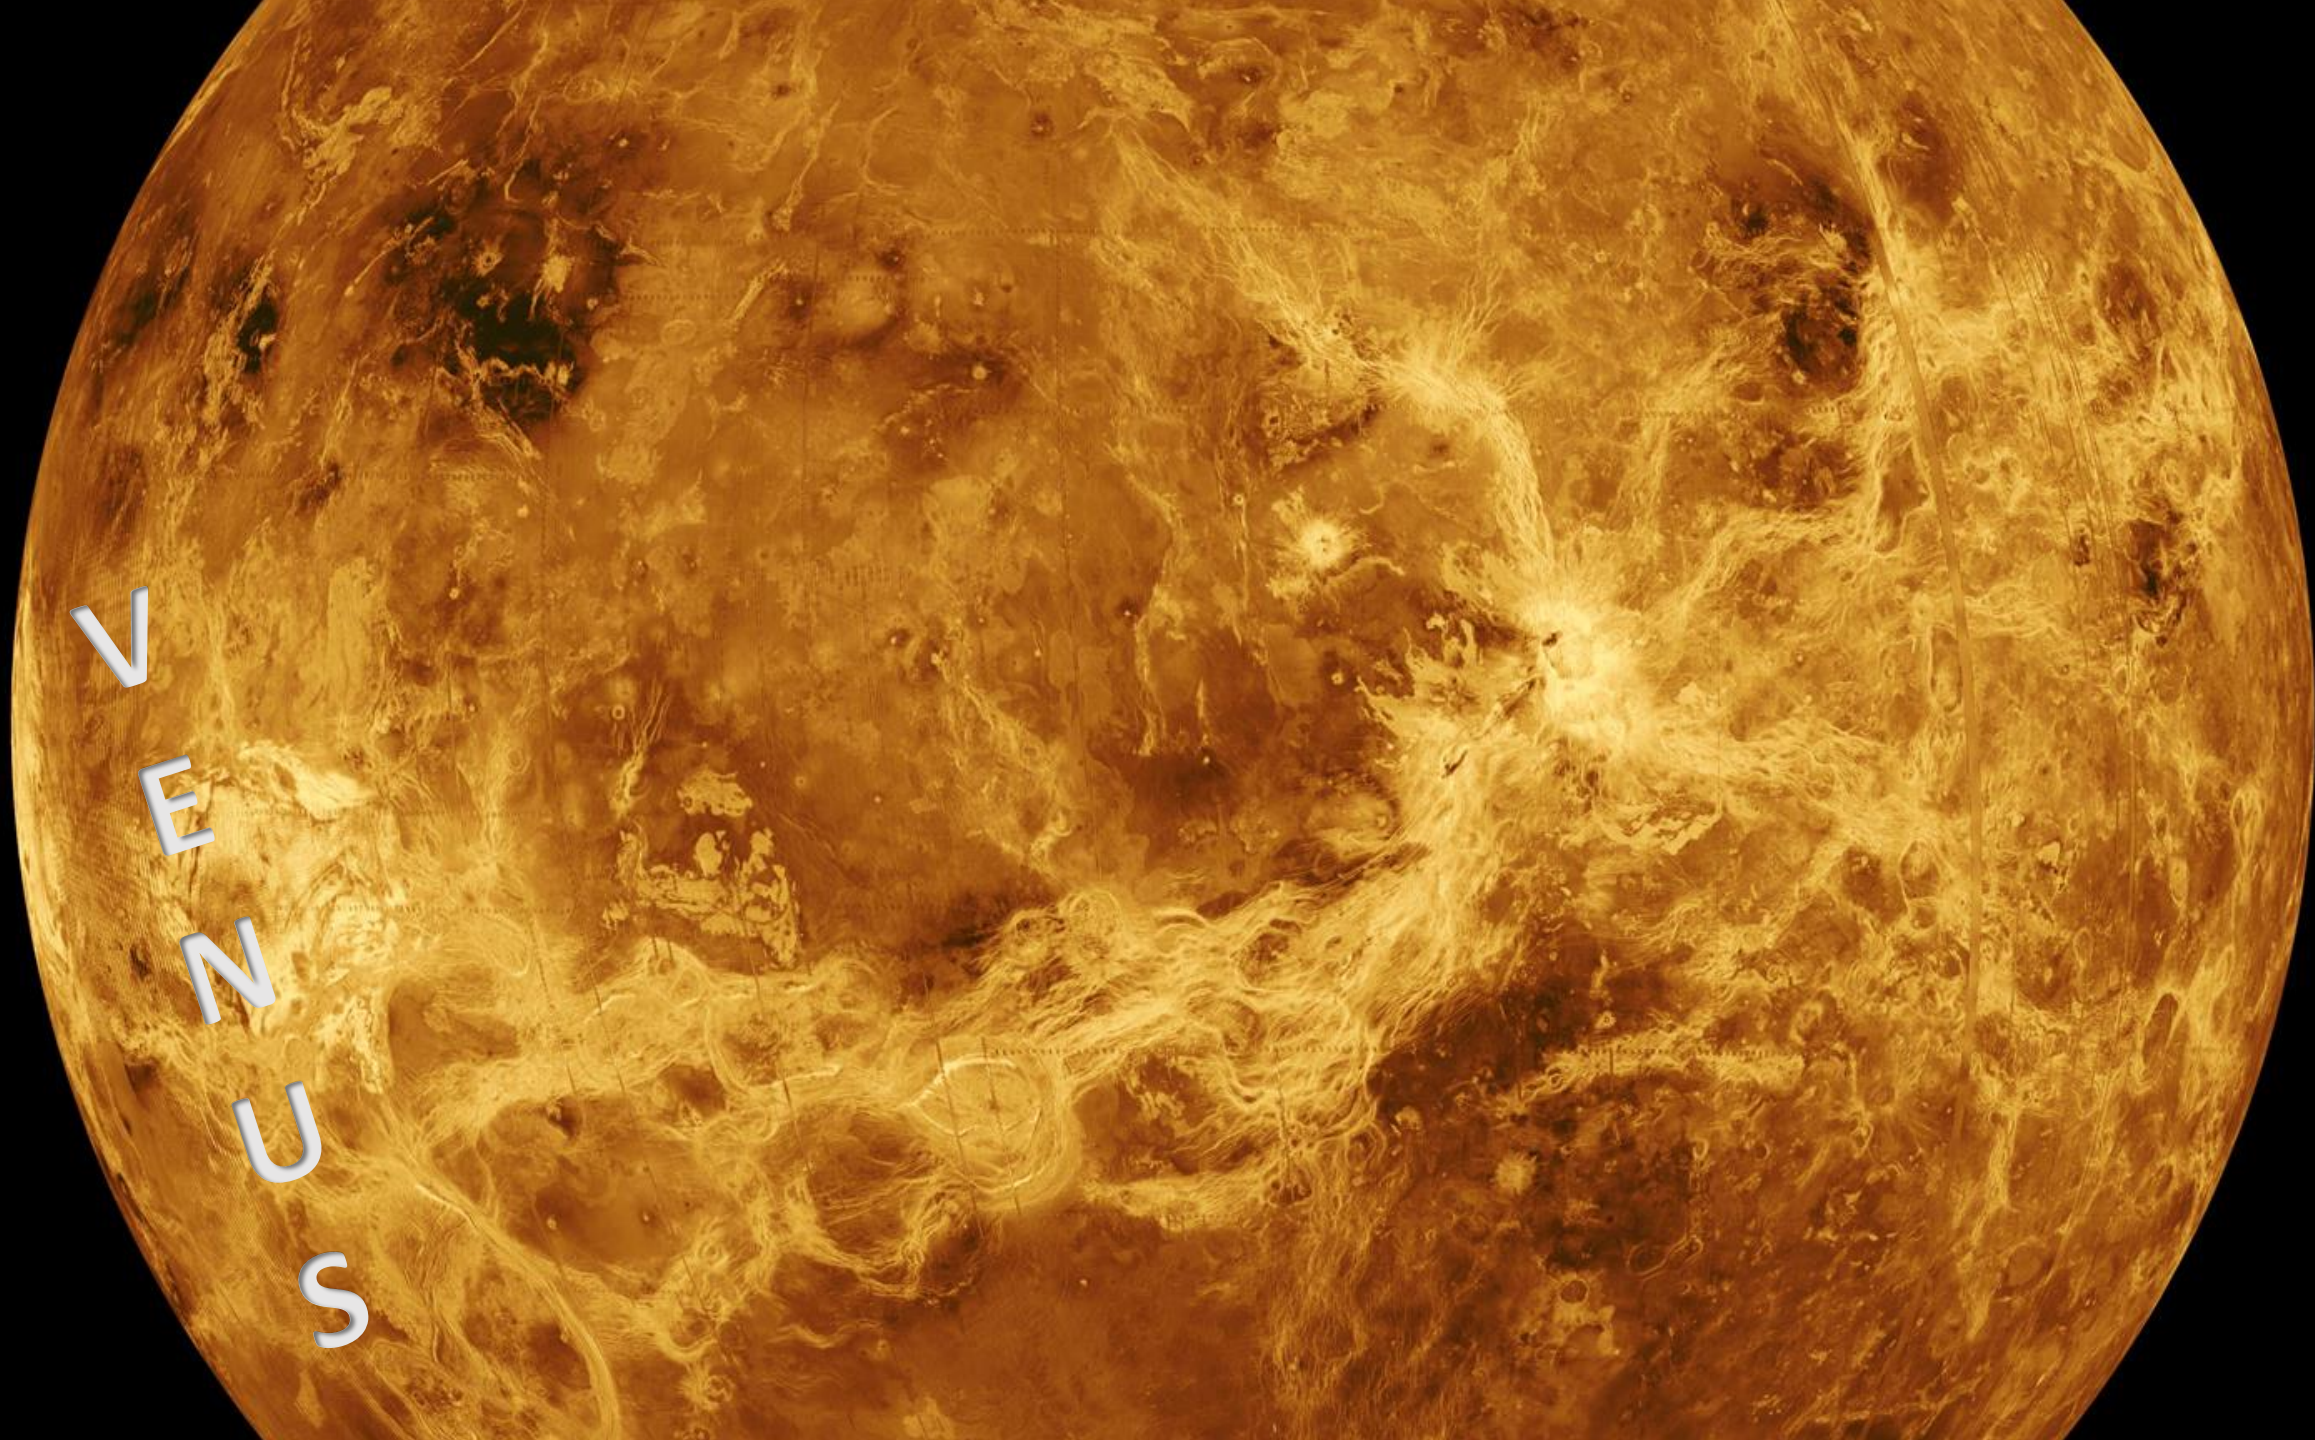

Our Solar System

Asteroids

COMETS

A night sky filled with stars, with a bright meteor streaking across the upper portion. The foreground shows a dark, silty landscape with mountains under a deep blue twilight sky.

Meteors Shooting Stars
